This is the first screen when loaded. It has 'Loading...'. This screen seems very incomplete, however we don't use this screen so no changes are necessary.

To enter the program, use the 4 bars (circled) in the header to access each of the 4 screens.

Currently, there is no data in the program. This is why the graph is empty. In order to access and load data, click the 'NAV' button (circled) You then come to this screen.

This is where all the data is uploaded. We generate files for the data, and upload in CSV format. Now, when we upload the data, the program looks like this:

Please note: This is just sample data, as for some inconsistencies. We are continually working on improving the accuracy of our data and for it to match. This is however an internal engineering issue.

NOTE: This website is locally run and does not require to be live, though we want it working very smoothly

CHANGES

1. Header (across all pages)
      - Title: Change 'Victorian State Finals' to 'Australian National Finals'
      - Location: Change 'Docklands, Melbourne' to 'Adelaide, Australia'
      - Date & Time: Make date and time automatic and NOT static

2. Header Graphics (across all pages)
      NOTE: All of these SVG files have been updated, however have not been updated in the code or website
      - Australia symbol: Change this to all white
      - Hyperdrive logo: Change this to new logo
      - Navigation bars: Change this to new 'stripes'

3. Timing Leaderboards

- On the timing leader board, you can see that it shows 'Best Net Lap' which corresponds to 'RACE_RESULTS' on the CSV file. However, on the CSV file we also have 'GRAND_PRIX' which we aren't able to view on the program. I
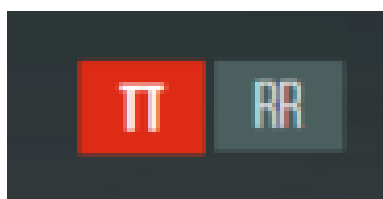

- Is there anyway to be able to add a toggle, similar to the 'TT' & 'RR' toggles which will allow us to view the Grand Prix leader board and potentially add even more different 'Leader boards'

|	A	B	C
1	TEAMS	RACE_RESULTS	GRAND_PRIX
2	Hyperdrive	0.001	0.001
3	Nangamay	0.001	0.001
4	Revolution Racing	0.001	0.001
5	Entropy	0.001	0.001
6	Metrics	0.001	0.001
7	Speeding Missile	0.001	0.001
8	Hard Edge Racing	0.001	0.001
9	Ludicrous Speed	0.001	0.001
10	Golden Diversity	0.001	0.001
11	Instant Transmission	0.001	0.001
12	Rapid Progress	0.001	0.001
13	Fast Forward Racing	0.001	0.001
14	Cosmos	0.001	0.001
15	Flux Racing	0.001	0.001

4. Sort Timing

    - On the race timing, is there a way to be able to sort each 'Race Format' run by the label. i.e. Net Lap, Gross Lap, Lane, Reaction Time.
    - This would mean when you click on one of the titles, each run rearranges to show the fastest in order according to that label.
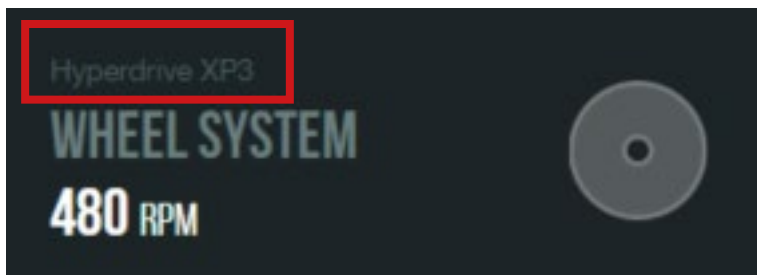

4. LERS Time Advantage Bug '98%'

    - Please fix this bug

5. Car Name
    - Be able to change the name of the car

5. Load/Change Car Render
    - The image will not load (important that it does)
    - We will need to change the image to new car design

6. Greatly improve Social Screen
    - Place sponsors bar across the bottom of page (ensure logos load)
    - Embed YouTube videos
    - Embed social feeds (if able to) i.e. Facebook, Instagram, Twitter
